'These books, more revenant than remnant, demonstrate a body of work that will not lie down, that continues its conversation with culture and the real, and reasserts deconstruction as being not a fad whose time has come, but a way of noticing what goes on when we use language now and then, as it happens, when it counts. This volume builds on the insights of Belsey's influential Critical Practice to provide not only an accessible introduction to contemporary theories of what it is to be human, but a major new contribution to current debates about culture.
