Interested in studying with us? The program encompasses a wide range of rehabilitation counseling issues, theories, and practices, including multicultural counseling, attitudinal and environmental barriers for people with disabilities, rehabilitation services, case management, medical and psychosocial aspects of disability, job placement, and ethical standards for rehabilitation counselors. Doctoral students conduct research and critically examine curriculum, teaching, and learning processes to advance knowledge about assessment

and the characteristics and politics of learning environments. The country reports in this series analyse major issues facing evaluation and development. This certificate provides sound understanding of organizations as human systems. Utilizing a transdisciplinary approach to the preparation of special education scholars and leaders, the program helps students acquire knowledge in the fields of neuroscience, cognitive psychology, and the developmental sciences and translate that knowledge to the most pressing issues to special education today. SROI aims to provide an evaluation of the broader social, environmental, and economic impact of the program for Business, Innovation and Skills.
