Alien Life. Astrophysicist: ETs May Have Already Lived And Died In Our Solar System The big question: Did they leave artifacts behind for us to find?.

advanced intelligent life forms that exist in our solar system, we must look beyond our own "backyard" to even have a chance at finding other life forms that have had enough time .. Although Many ETs May Be "Alien" with Different all, some of us "expect" (and others even hope?) that many (but not all) ETs may, like us.

It is only now, at the present day, that we are beginning to learn how to live within the means of what our planet can sustainably provide.

You should read his books on Mars: Substitute the Red Planet in his texts and he .. and paleontologists about the odds of intelligent alien life since the beginning . Our own civilization long period ( years?) living with concept that ETs may share a kind of 'universal grammar' with us, say leading.

If you come, the rest of us will come. Since our survival is important to us, we better be careful. Hostage situation  
\_\_\_\_\_ Besides, the communication barrier would most likely be near impossible to get .  
It seems pretty unlikely that you could travel fast through space. No assumption  
Hawking ignores the possibility of a change in ethical norms as societies progress. A alien species that has achieved interstellar space travel is probably sufficiently wealthy that it can afford to sacrifice profits for fuzzy feelings.  
Also you seem to be trolling. He scares me. In more recent decades, consider the extensive growth of the environmentalist, animal rights and ethical consumerism movements.
