There were twenty-two individual presentations within the six panels, not all of which can be detailed. Additionally, the question of which methodological approaches are most useful in different research settings was discussed. Interviews, participant observation, and a mixture of both, but also innovative methods were put to the test with regard to a range of research questions, especially in dealing with silence – a subtle means of communication often underestimated in favor of

the spoken word.

Both Lidola and Rutishauser showed that investments in public health provision
