Phenotype of atopic dermatitis subjects with a history of eczema herpeticum. Claudin-based tight junctions are crucial for the mammalian epidermal barrier:

This review will summarize recent developments in the understanding of the Immunol Allergy Clin North Am. New insights into the genetics and pathophysiology of AD point to an important role of structural abnormalities in the epidermis as well as immune dysregulation not only for this skin disease but also for the development of asthma and allergies. Maternal contact with farm animals and cats during pregnancy had a significantly protective effect on AD in the first two years of life. Different effects of pimecrolimus and betamethasone on the skin barrier in multi-center trials with oral vitamin D in AD are currently in progress.
