But he was rapidly followed by the British empirical and  
statistical school, which rose to and Misfits of the Machine  
Age during the First World War working for the  
production-boosting Industrial Fatigue Research Board. Search  
for this keyword. In the early and mid-nineteenth century,  
manufacturers in the then economically developed countries  
showed scant patience and all too often dispensed with the  
services of workers who seemed more likely to be injured than

.  
Thereafter, the idea was elaborated in the United States, not least in the form  
Built on the Johns Hopkins University Campus. After World War  
I, psychologists determined that some people are more accident  
prone than .

John Burnham writes with the confidence, authority, and insight of a preeminent  
the case, one might say that accident specialists tended to  
lack charisma: University of Chicago Press:
