However, prayer with or for patients and singing spiritual songs had the highest count of interventions perceived to be effective. Introduction Background information Historically, the notion of approaching individuals as bio-psychosocial and spiritual beings has been recognised within the nursing profession.

Nurserelationshipsinthehealthcarecontext.Aqualitativestudy', Journal of Advanced Nursing 57 6 A

A qualitative study', Journal of Advanced Nursing 57 6 A limitation that may have affected the credibility of the findings was the use of the convenience sample. It seemed therefore, necessary to obtain a contextualised view of spiritual nursing care by drawing upon the views of those persons who render such care in the clinical context.

OrtegayGassetwasaSpanishphilosopherandwriterlinkedtothe...Research seem to have understood this right and integrated spiritual nursing care from their point of view and belief particularly of the Christian faith with however a non-judgemental attitude

towards the beliefs of their patients and of their colleagues.
